

**A Crack in Creation: Gene Editing and the Unthinkable Power to Control Evolution**  
Jennifer Doudna and Samuel Sternberg (2017)

**PROLOGUE:**

pp.xi-xx      Personal

**PART I: The Tool**

- pp.3-8      Case studies: Miraculous cures of inherited diseases
- pp.8-15      Basic molecular biology and genetics
- pp.15-26      Early gene therapy
- pp.26-34      JD's early history foretelling CRISPR, and CRISPR's precursors
- pp.35-39      JD history
- pp.39-45      Early CRISPR history
- pp.45-51      Phage history
- pp.51-59      JD role in early CRISPR history
- pp.60-85      JD role in early CRISPR history leading to key publication
- pp.86-96      JD's initial lab application of CRISPR
- pp.96-100      World's initial lab applications of CRISPR
- pp.101-114      How CRISPR works

**PART II: The Task**

- pp.117-153      Practical uses of CRISPR
- pp.154-158      CRISPR on the world stage
- pp.158-162      Somatic vs germline, in vivo vs ex vivo
- pp.163-178      Clinical examples
- pp.178-181      CRISPR accuracy
- pp.184-201      Concerns about germline modification
- pp.201-205      Concerns about recombinant DNA (1970's); Berg letter; Asilomar II
- pp.205-212      Germline modification; IGI forum (2015); Berg letter II
- pp.213-222      First human germline experiment and responses
- pp.222-240      Case for human germline modification and reservations

**EPILOGUE**
