Research Assistant Positions at VCU (ECE)

Research Assistant positions are available for Ph.D. candidates with Dr. Ruixin Niu at Department of Electrical and Computer Engineering, Virginia Commonwealth University (VCU). Dr. Ruixin Niu is an internationally known scholar in the general area of statistical signal processing and its applications, including but not limited to detection, estimation, tracking, information fusion, wireless communications, and resource management, especially in the context of networked systems such as sensor networks, cognitive radio networks, and MIMO radars. For more information about his research interests, please visit http://www.people.vcu.edu/~rniu. The information about applying the Ph.D. program and the admission procedure can be found at http://www.egr.vcu.edu/page.aspx?id=153.

Students interested in working with Dr. Niu are welcome to contact him via email at rniu@vcu.edu. In the email, please attach your resume, and explain your strong candidacy for the position. For those who already have academic publications, please send him your best work. Priority will be given to the candidates who have strong mathematical background, analytical skills, and familiarity with Matlab.
